Professional Experience

September 2018 – Present

Thiqah Business Services

Riyadh-Saudi Arabia

Senior Software Developer

- .Net Core, Angular 7, Asp.Net Zero, MVC, Entity Framework, C# language, SQL Database, web API, Swagger, Agile Scrum Framework.

Projects:

- eMazad: is a real time application for online auction, where it is allowed bidders to bid online for the goods sold in the auction through electronic payment methods. We use in this system the following technologies:
 - 1- ASP.Net MVC, Entity Framework, Unit Test, domain-driven design, SQL DB for portal.
 - 2- Restful API, Swagger, Dapper ORM for mobile Application.
 - 3- Angular 7 that used in dashboard and admin reports.
 - 4- RabbetMQ, MassTransit to integrate with payment gateway
- **Mwathiq**: is a system that enables individuals and businesses to do their legal transactions through notaries accredited by the Ministry of Justice at any time and place without the need to visit the Ministry. We use in this system the following technologies:
 - 1- ASP.Net MVC, Entity Framework, Unit Test, domain-driven design, SQL DB for portal.
 - 2- Restful API, Swagger, Dapper ORM for mobile Application.
 - 3- Angular 7 that used in dashboard and admin reports.
 - 4- RabbetMQ, MassTransit to integrate with payment gateway

Pioneers outsourcing

Riyadh-Saudi Arabia

Senior Software Developer

August 2016 – September 2018

- SharePoint, MVC, Entity Framework, C# language, SQL Database, web API, JavaScript, AJAX, and JSON.

Projects:

- **Pioneers Internal site:** The purpose of this Project is to automate all internal processes of the company such as (HR requests, Admin & purchases orders, Assets Management), where we used SharePoint 2013 platform to build the project and handle these processes. My duties in this project as the following:
 - 1- **Administration:**
 - o Prepare SharePoint farm (Install the software on the servers).
 - o Configure SharePoint Services and fix the issues of it.
 - 2- **Development:**
 - o Create Master page and page layouts
 - o Develop custom web Part
 - o Create workflow using SP designer and VS2012
- **Cloud Integration:** convert some of solutions of company to be “software as a service” SAAS. My duties in these projects are to prepare the solutions be accepting multi-tenant and integrate it with the cloud.
-
